

> M&G Corporate Bond Fund

Fund Objective & Strategy

The Fund invests in sterling denominated fixed and variable rate securities, including corporate bonds and debentures with the aim of achieving a higher return from investment than would be obtainable in UK government fixed interest securities (i.e. gilts) of similar maturities. The Fund may, however, hold gilts where it is deemed appropriate. The investment manager has the power to use futures traded or dealt on an eligible derivatives market (currently being The London International Financial Futures and Options Exchange) for the purpose of hedging the capital value of the Fund against the risks of adverse movements in long term interest rates.
